The History of Holmes Farms

Holmes Farms started in 1976 with Corey's father, Richard Holmes on a 190 acre farm outside of New Holland, IL

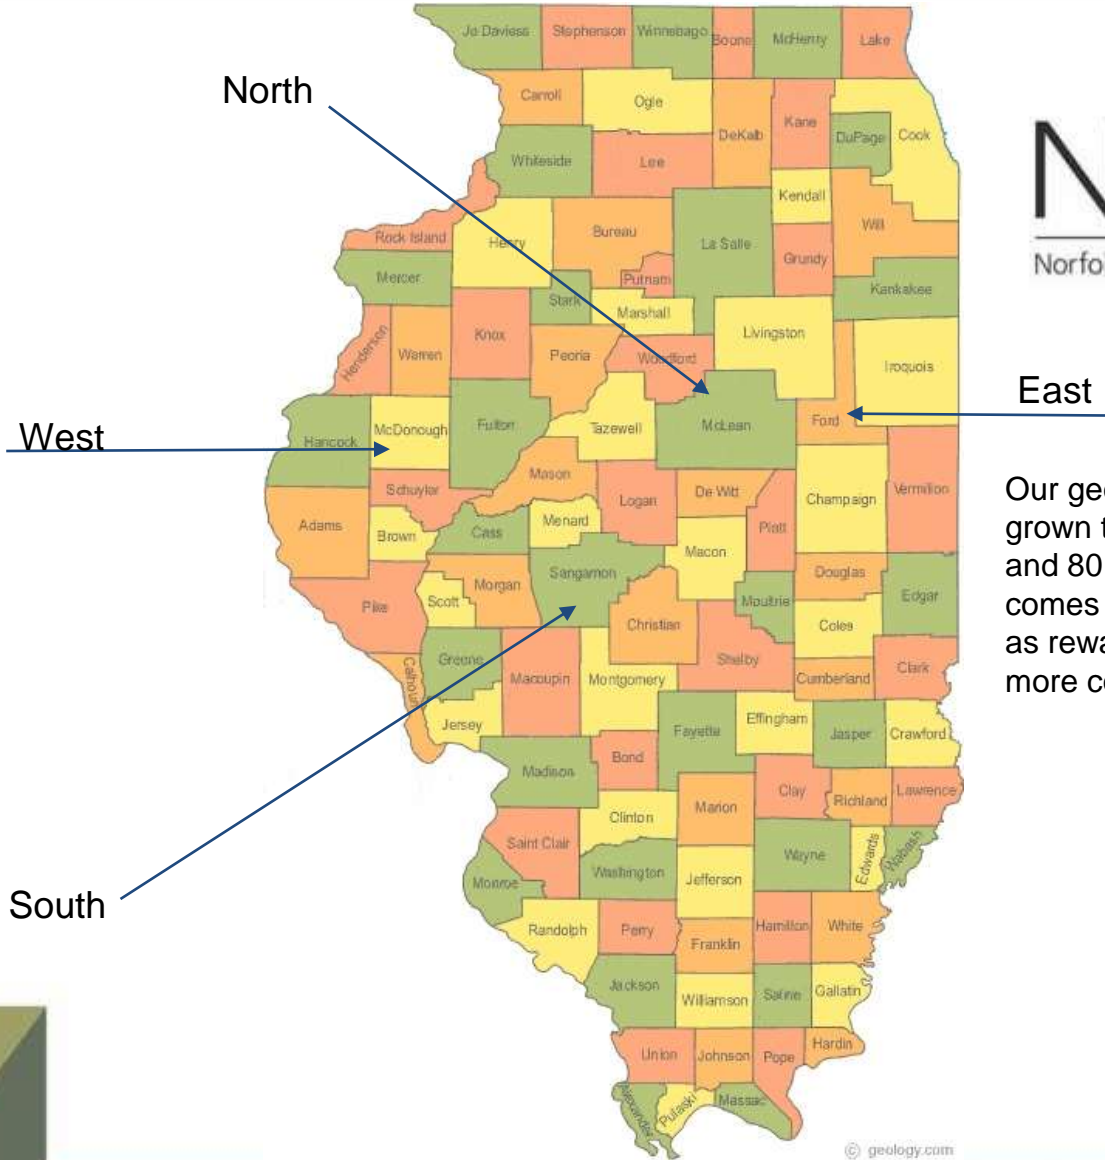

Corey officially joined the farm in 2003 with purchasing a 80 acre farm across the road from the original farmstead. Since then Corey and Rick have worked at growing the farm as well as keeping up with the latest technology as well as staying ahead of the curve by attending peer groups and education classes like TEPAP (The Executive Program for Agriculture Producers)

TEPAP
The Executive Program for Agricultural Producers

#NORFOLKFARMING

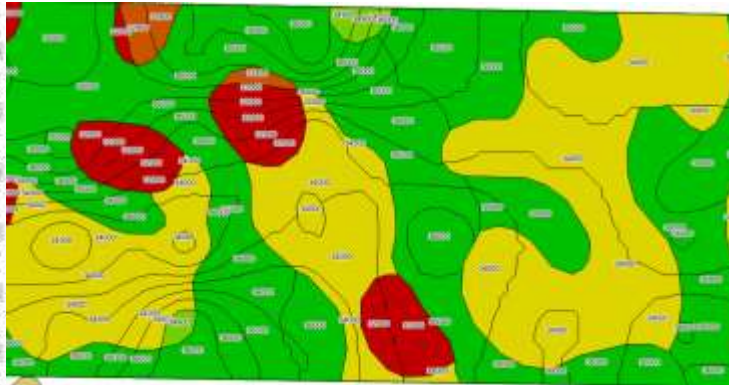

Our geographic spread has grown to 150 miles east to west and 80 miles north to south. This comes with challenges as well as rewards. It has helped with more constant average yields

Seed Treater and Chemical Shed have been some of our newest expansions to help with all the best treatments and chemicals while yet controlling costs

Harvest Time

Grain storage has been a growing investment. From our own elevator to getting a bagger to help with storage and logistics in the heat of the harvest.

#NORFOLKFARMING 

Landowner and Investor Relations

We strive to keep our landowners involved with the farm as well as their kids. Also keep the investors in line with good land purchases that are going to appreciate to build solid returns
